Part II Organizational Action Attach additional statements if needed. See back of form for additional questions.

14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶ During the fiscal year ended October 31, 2014, the issuer distributed amounts to its shareholders; a portion of which constituted a non-taxable return of capital. See attachment for a list of distribution dates and return of capital amounts per share.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ The attachment provides the total distribution per share, as well as the non-taxable return of capital per share on a distribution by distribution basis. The return of capital per share should reduce the taxpayer's adjusted basis of each share held on the date of each listed distribution by 15.32% of the original distribution amount. For example, if you held one share with an original basis of \$10.00 on ex date 1/29/14, the return of capital is \$0.009958. Your shareholder basis would be reduced and now equals \$9.990042 per share.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ An analysis of the issuer's current and accumulated earnings and profits was performed as of 10/31/14, in order to determine the portion of the distribution that constituted a dividend and the portion that constituted a non-taxable return of capital.

18 Can any resulting loss be recognized? ▶ The return of capital per share should reduce the taxpayer's adjusted basis of each share held on the date of the distribution. Upon distribution of all or a portion of the shares, the taxpayer should recognize greater gain/less loss.

Horizontal lines for providing information regarding loss recognition.

19 Provide any other information necessary to implement the adjustment, such as the reportable tax year ▶
The reportable tax year of the distributions is 2014. Actual return of capital will be reflected on the taxpayer's 2014 Form 1099.
