The DNP Select Income Fund Inc. (NYSE: DNP) is a diversified, closed-end management investment company that first offered its common stock to the public in January 1987. The Fund’s primary investment objectives are current income and long-term growth of income. Capital appreciation is a secondary objective. DNP has outstanding $300 million preferred stock, $400 million secured borrowings, and $300 million secured notes as of 4/30/20 to leverage the common stockholders’ investment.

The Board of Directors adopted a Managed Distribution Plan, which provides for the Fund to continue to make a monthly distribution on its common stock of 6.5 cents per share. Under the Managed Distribution Plan, which required an SEC exemptive order to implement, the Fund will distribute all available investment income to shareholders. If and when sufficient investment income is not available on a monthly basis, the Fund will distribute long-term capital gains and/or capital gain to its shareholders. The Board may amend, suspend or terminate the Managed Distribution Plan without prior notice to shareholders if it deems such action to be in the best interest of the Fund and its shareholders.

Dividends are paid monthly. A dividend reinvestment plan is available to registered shareholders to reinvest dividends in additional Fund shares. For registered shareholders desiring monthly cash dividends, the Fund has a direct deposit plan.

The Fund seeks to achieve its investment objectives by investing primarily in a diversified portfolio of equity and fixed income securities of companies in the public utilities industry. The Fund’s investment strategies have been developed to take advantage of the income and growth characteristics, and historical performances of securities of companies in the public utilities industry.

Under normal conditions, more than 65% of the Fund’s total assets will be invested in securities of public utility companies engaged in the production, transmission or distribution of electric energy, gas or telephone services. The Fund may invest in the securities of domestic and foreign issuers as well as in securities of companies of any market capitalization, including small and mid cap common and preferred stocks. The Fund may not invest more than 25% of its total assets (valued at the time of purchase, including reinvestment of dividends) in securities of companies engaged principally in any one industry other than the public utilities industry, nor have more than 20% invested in foreign issuers. The Fund will purchase a fixed income security only if, at the time of purchase, it is rated investment grade by at least two nationally recognized statistical rating organizations.

This information does not represent an offer, or the solicitation of an offer, to buy or sell securities of the Fund.

---

Net Asset Value vs. Market Price: Net Asset Value (NAV) represents the total value of all assets held by the Fund (minus its total liabilities), divided by the total number of common shares outstanding. The net asset value return reflects the performance of the manager. Market price is the price at which investors may purchase or sell shares of the Fund. As of October 31, 2019, the fund gross expenses ratio is 2.29%. Shares of the fund are bought and sold on the NYSE and are not subject to a sales charge. Excluding brokerage expenses, the expense ratio would have been 1.00%. Market price is determined in the open market by buyers and sellers, based on supply and demand. The Fund’s Market Price fluctuates throughout the day and may differ from its underlying NAV. Shares of the Fund may trade at a premium (higher than) or a discount (lower than) to NAV. This characteristic is a risk separate and distinct from the risk that the Fund’s net asset value could decline. The Fund has no control over the market price.

Fund Distribution and Managed Distribution Plan:

Under the terms of the Fund’s Managed Distribution Plan, the Fund seeks to maintain a consistent distribution level that may be paid in part or in full from net investment income, realized capital gains, and a return of capital, or a combination thereof. The Fund is permitted to distribute more than its income and capital gains; therefore, a portion of your distribution may be a return capital. A return of capital could occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund’s investment performance and should not be confused with “yield” or “income.”

The amounts and sources of distributions reported in Section 19(a) Notices are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund’s investment experience during the remainder of the fiscal year and may be subject to changes based on tax regulations. Please note that the characterization of Fund distributions for federal income tax purposes is different from book accounting generally accepted accounting principles (“GAAP”). The Fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

You should not necessarily draw any conclusions about the Fund’s investment performance from the amount of this distribution.

The following table sets forth the estimated amounts of the current distribution, payable May 11, 2020 and the cumulative distributions paid this fiscal year to date from the following sources: net investment income; net realized short term capital gains; net realized long term capital gains; and return of capital or other capital source. All amounts are expressed per share of common stock based on U.S. generally accepted accounting principles, which may differ from federal income tax regulations.

Average Annual Total Return* on NAV for the 5 years ended on March 31, 2020 5.47%

Annualized Current Distribution Rate expressed as a percentage of NAV as of March 31, 2020 9.70%

Cumulative Total Return on NAV for the fiscal year through March 31, 2020 -20.82%

Cumulative Fiscal Year Distribution Rate as a percentage of NAV as of March 31, 2020 4.04%

*Simple arithmetic average of each of the past five annual returns.

Important Risk Considerations

Equity Securities: The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. A fund that focuses its investments in a particular industry or sector will be more sensitive to conditions that affect that industry or sector.

Credit and Interest: Debt securities are subject to various risks, the most prominent of which are credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt securities may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer term maturities.

Preferred Stocks: Preferred stocks may decline in price, fail to pay dividends, or be illiquid.

MLPs: Investments in Master Limited Partnerships (MLPs) may be adversely impacted by tax law changes, regulation, or factors affecting underlying assets.

Foreign Investing: Investing internationally involves additional risks such as currency, political, accounting, economic, and market risk.

No Guarantee: There is no guarantee that the portfolio will meet its objective.

Leverage: When a fund leverages its portfolio, the value of its shares may be more volatile and all other risks may be compounded.

Market Volatility: Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on the fund and its investments, including hampering the ability of the fund’s portfolio manager(s) to invest the fund’s assets as intended.
