Fund Overview

The Fund

Duff & Phelps Utility and Corporate Bond Trust Inc. (the "Fund"), a diversified closed-end investment company, first offered its common stock to the public in January of 1993.

Investment Objective

The Fund's investment objective is high current income consistent with investing in securities of investment grade quality. There can be no assurance that the Fund will achieve its investment objective.

Portfolio Contents

The Fund seeks to achieve its investment objective by investing substantially all of its assets in a diversified portfolio of Income Securities. As specified in the Fund's prospectus, Income Securities consist of Utility Income Securities, Corporate Income Securities, Mortgage-Backed Securities and Asset-Backed Securities (each as defined in the prospectus). In normal market conditions, at least 80% of the Fund's total assets must be invested, in the aggregate, in Utility and Corporate Bonds, and at least 25% of the Fund's total assets must be invested in Utility Income Securities.

Leverage

The use of leverage enables the Fund to borrow at short-term rates and invest at long-term rates. As of January 31, 2018, the DUC Fund's leverage consists of senior debt in the amount of \$105 million. On that date, the total amount of leverage represented by the senior debt constituted approximately 29% of the Fund's total assets.

Shares of closed-end investment companies such as the Fund trade in the market above, at, and below net asset value. This characteristic is a risk separate and distinct from the risk that the Fund's net asset value could decline. The Fund is not able to predict whether its shares will trade above, below or at net asset value in the future.

This information does not represent an offer, or the solicitation of an offer, to buy or sell securities of the Fund. For additional information please see the Fund's most recent semi-annual report.

Portfolio Characteristics as of 1/31/18 (unaudited)¹

Industry Allocation

Industry	%
U.S. Gov't & Mortgage-Backed Securities	0.1
Financial	26.3
Industrial	14.6
Telecommunications	2.3
Electric, Gas & Water	38.1
Oil & Gas Storage, Transportation and Production	18.7

Ratings as a Percentage of Long-Term Investments

Ratings ²	%
AA	0.1
A	29.3
BBB	69.4
BB and Below	1.2

Portfolio Characteristics

Effective Avg Maturity	3.6 Years
Effective Avg. Duration	3.1 Years

¹Percentages based on total investments rather than total net assets. The portfolio is actively managed and subject to change.

²The ratings issued by Nationally Recognized Statistical Rating Organizations assess the credit worthiness of a corporation's or government's debt issues. The ratings apply to the Fund's holdings and not the Fund itself. The lower rating of Moody's Investor Service, Inc. or Standard & Poor's Financial Services LLC is used. If a particular security is rated by either Moody's or S&P, but not both, then the single rating is used. If a particular security is not rated by either Moody's or S&P, a rating from Fitch Ratings Ltd. is used, if available. Ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB and below are below-investment grade ratings.

Important Risk Considerations

Credit & Interest: Debt securities are subject to various risks, the most prominent of which are credit and interest rate risk. The issuer of a debt security may fail to make interest and/or principal payments. Values of debt securities may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer-term maturities.

Industry/Sector Concentration: A fund that focuses its investments in a particular industry or sector will be more sensitive to conditions that affect that industry or sector than a non-concentrated fund.

Foreign Investing: Investing internationally involves additional risks such as currency, political, accounting, economic, and market risk.

No Guarantee: There is no guarantee that the portfolio will meet its objective.

Leverage: When a fund leverages its portfolio, the value of its shares may be more volatile and all other risks may be compounded.
