Fund Distribution and Managed Distribution Plan:

Under the terms of the Fund's Managed Distribution Plan, the Fund seeks to maintain a consistent distribution level that may be paid in part or in full from net investment income, realized capital gains, and a return of capital, or a combination thereof. The Fund is permitted to distribute more than its income and capital gains; therefore, a portion of your distribution may be a return capital. A return of capital could occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income."

The amounts and sources of distributions reported in Section 19(a) Notices **are only estimates** and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund's investment experience during the remainder of the fiscal year and may be subject to changes based on tax regulations. Please note that the characterization of Fund distributions for federal income tax purposes is different from book accounting generally accepted accounting principles ("GAAP"). The Fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

You should not necessarily draw any conclusions about the Fund's investment performance from the amount of this distribution.

The following table sets forth the estimated amounts of the current distribution together with the cumulative distributions paid this fiscal year-to-date (YTD) from the following sources: net investment income, realized capital gains and return of capital. The Fund's fiscal year ends on October 31. All amounts are expressed per share of common stock based on U.S. generally accepted accounting principles, which may differ from federal income tax regulations.

Distribution Estimates	July 2023		Fiscal Year-to-date (YTD)	
	Per Share Amount (\$)	% of Current Distribution	Per Share Amount (\$)	% of YTD Distribution

Important Risk Considerations

Credit and Interest: Debt securities are subject to various risks, the most prominent of which are credit and interest rate risk. The issuer of a debt security may fail to make interest and/or credit payments. Values of debt securities may rise or fall in response to changes in interest rates, and this risk may be enhanced with longer term maturities.

Municipal Market: Events negatively impacting a municipal security, or the municipal bond market in general, may cause the fund to decrease in value.

Tax Liability: Noncompliant conduct by a municipal bond issuer, or adverse interpretations, could cause interest from a security to become taxable, subjecting shareholders to increased tax liability.

State and AMT Tax: A portion of income may be subject to some state and/or local taxes and, for certain investors, a portion may be subject to the federal alternative minimum tax.

No Guarantee: There is no guarantee that the portfolio will meet its objective.

Leverage: When a fund leverages its portfolio, the value of its shares may be more volatile and all other risks may be compounded.

Market Volatility: Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on the fund and its investments, including hampering the ability of the fund's portfolio manager(s) to invest the fund's assets as intended.
